

Diver Lake Fishing Report

Went to Diver lake this afternoon (Friday, 16 Jan.) as it was just too nice to stay home.

Tried an olive Sprately, a red Sprately, a micro mink leach and a buggered green Neal all with no luck. Water temp was 41.3' F. The winter doesn't seem to have had much effect on the weed beds.

Watched a family of otters, mom, dad, and last year's kit working the far side weed beds. Didn't see them getting anything either.

Cheers, Basher
