Any club members who missed the day's fishing at Panther on Saturday should be kicking themselves! Gerry Stevens, Bob Leverman and I had a stellar day on Panther with the fish hitting fairly regular all the time we were there with some periods of non-stop action. There were also periods when they would take the dry fly, but it seemed to be wind dependent.

When the wind dropped down, they would start rising and would take the dry flies. For me, the most effective flies were Caddis imitations for dry flies and Boobies in black and green with white eyes. They also hit many other patterns including Damsel nymphs and variations on micro-leeches.

Ian

Panther Lake: _Gerry on the water to get the first fish.
