

## **Fishing Report: Eve River Sept 14 to 16**

**From:** Bruce Murray [drbm@shaw.ca]

**Received:** September 20, 2015

After my experience last week dodging bullets, I mean well aimed rocks thrown by a 35 year old poacher on the Englishman R... the sights and sounds, good company, camaraderie, and serenity of the Eve River was a blessing...Lots going on ...Whales, Sea Lions, Eagles and Bears whacking near-finished pinks, Cruise Ships, spawning pinks all the way to Junction Pool and beyond.... makes for a great outing; not to mention the super accommodations at the village.

John, Glenn and I headed out on Monday Sept 14<sup>th</sup> for the Eve on the recommendation of our Chek 6 weather man that 3 days of rain was in store....NOT...It was beautiful sunny but wind-burn weather and the coho stayed away from the already low Eve River. A total of two dark coho caught by the 7 fishers present, one dolly varden and all the dark and moldy pinks you care to foul hook...gawd. With this present rain, I am sure we are close to coho time....pass the word to all your non-rock throwing friends.

**Again, see you all at Tuesday's General meeting**

## **Fishing Report: Campbell/Quinsam Rivers**

**From:** Wayne Pealo [fishon048@icloud.com]

**Received:** September 19, 2015 4:36pm

Fishing report: lots of Cutthroat in the Campbell and Quinsam systems. No sign of coho or jacks yet. Plenty of skunks pinks!
