Went to Wowo Lake yesterday with a couple of guys from the fishing club. It's through a locked gate (we had the key) on timber land and experienced some decent fishing.

I ended up hooking maybe twenty during a feeding period of a couple of hours, then it just died.

Caught fish on the .....yes you guessed it the Boobie, and a bunch on two different chironomids under a bobber. Malcolm and Brian would be proud I actually pumped the fish to determine what to hang under the bobber.

Also caught 1/2 dozen on Glen's Wonder leech including the one shown.

The Rod Holder worked like a dream.
