

Crapper Caper 2016

From: Bob Kissinger [basherbob@outlook.com]

Once again a brave band of IWFFER's journeyed to the far reaches of the EVE river to repair and re-paint the crappers and clean the ground and weed wack the tall grass in the "lower village"

This brave band included our drivers, Jack and Mike as well as the cheap labour who consisted of Bernie, Gord, John, Lance, Gary, Ant and myself, aka, Basher.

We arrived at about 10 a.m. and immediately fell to work, wacking and cleaning

and painting etc. At one time we had three weed wackers wacking away.

As you can see our painters , Gary and Bernie did a marvelous job of painting the crappers a nice “cranberry” (Bernie was adamant that it wasn’t pink).

At about noon we broke for the traditional smokie and beer lunch which Ant seemed to particularly enjoy.

After lunch we all geared up and headed to the river. The river was 12 to 18 inches above normal as it had rained for the three previous days. It was also quite “tea stained” which lowered the visibility as well. No one landed any fish although we all saw fish moving up river. Two fellows claimed to have hooked a fish each but you know what they say about fly fishers.

Over all it was again a great trip as we got the grounds cleaned, the biffies painted, the grass wacked, the garbage gone and even put up a few new “clean up you mess” signs.

We also feed a couple of other members who had come up the day before to camp over.

If it doesn't rain too much I would suspect that the fishing should be good by about the 15th or 16th of July.

Cheers

Basher
