Met Jason at Long Lake yesterday....drove past it a few hundred times but never fished it. Great access, coolish as the weather was building up for the big blow. Basher told us at pub lunch where the "hot spots" were and we did well there...Thanks Basher! Even out fished a guy fishing with worms....We were fishing mainly nightfire wooly buggers and leech pattern deep as the fish were showing close to the bottom.

Made two circuits around the lake before freezing up. Damage done was about a "metric dozen bows and one bass. The day was short but very enjoyable. Great company!

Meanwhile, Jim McEwan was fishing Westwood Lake and reported a good outing with 3 triploids 14" – 15".
