

Departure Bay Creek Riparian Planting Nov 24th

Bob Kissinger [basherbob@outlook.com]

Although it was a VERY wet morning a bunch of us, about a half dozen IWFFers, Departure Bay Neighbourhood Association members, some teachers and students from the Departure Bay Elementary School, R.D.N. staffers from the Water monitoring Program, a Nanaimo City horticulturist and a student or two from the V.I.U. fish tec. Program.

Pic 1 shows Jean-Michel and the city horticulturist talking about how to plant a salmon berry shrub. There were lots of those as well as ferns and cedars.

Pic. 2 shows our own Steve in yellow, planting a salmon berry with the help of a young student.

Pic. 3 shows our Bernie helping some students with their plantings

Pic. 4 is coffee and donut break. To get a good donut with all those students a guy had to move fast, fortunately with my size I could reach over them.

Not shown but in attendance was our Leo and Kiara from water monitoring. Hopefully I haven't missed anyone.

Cheers

Basher
