

Green Lake April 8th

Bruce Murray [drbm@shaw.ca]

Jason and I headed to Green Lake yesterday for the afternoon and had a good catch (a dozen or more), mostly larger fish from 2016 stocking and older fish as well as the catchables stocked last month. First fish caught was throat pumped and again the prime food was daphnia so Bruce fished the blob as well as the white professor. Jason fished the 90% emerger and a night fire leach. Number one producer this day was the 90% emerger, follow by the blob, then the white professor and then the night fire leach. Meanwhile, Tony texted to say he caught a nice 5 pound bow in Fuller lake on chironomids.
