

IWFF Members Volunteer in Nanaimo Hatchery Pink Salmon Otolith Recovery Program

IWFF members Bill Croft, Bernie Heinrichs, Staffan Lindgren, Bob MacEachern, Cal Tant and Jack Toomer joined Erica Blake this week (Oct 13th) collecting Pink Salmon carcasses on Napoleon and Haslam creeks.

Once collected, the carcasses were returned to the “laboratory” where surgery was performed to remove the Otolith or ear bone the primary bony structure used in age growth study determinations.

GOOD JOB TEAM unfortunately the patients did not recover.
