

Water Monitoring

From: **Bob Kissinger** [basherbob@outlook.com]

Well we are almost though for another year, just 3 more sampling days to go.

This past Tuesday morning was magnificent! We, Ron Busche, Ant Elsdale, Ton Plijnaar and I started at Barsby Park on the lower Millstone where aside from the great maples we ran into a family of about 6 or 7 river otters

Our next stop was a few km. upstream where the Millstone flows under the East Wellington Rd.

On the way to our last stop where McGarrigle creek goes under the Jingle Pot rd. we passed about a half dozen does and fawns on one side of the road with a small two point buck on the

other side. (I think the little fellow had some loving on his mind).

Once the sampling was completed we joined up with our second team for a coffee and a few giggles at McDonalds.

This is our 5th year and for the last couple of years our club has fielded two teams. If interested, we will be doing it again next year and will be looking for volunteers starting in about June.

Cheers
Basher
