

Gold Beadhead Chironomid

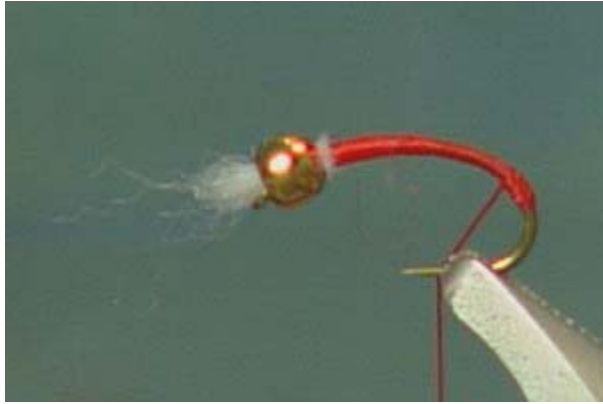

Hook: TMC 2487 Size 14
Thread/Tag: UTC 170 Red
Rib: Red Copper Wire
Body: Black Superfloss
Thorax: Peacock Herl
Head: 1/8 Gold Tungsten Bead
Gills: White Antron

Step 1: Tie in a small clump of white antron for the gills, whip finish and cut thread.

Step 2: Slide bead onto hook with the larger bead hole towards the eyelet.

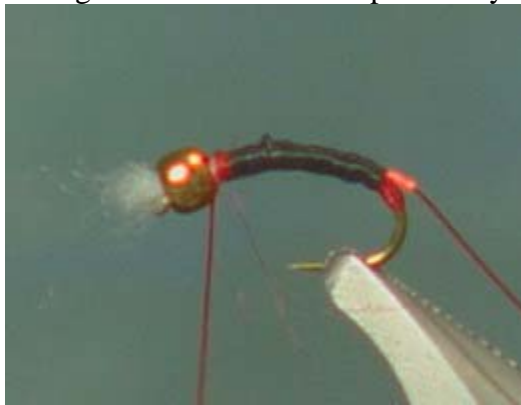

Step 3: Tie on thread and wrap a small red butt on the hook

Step 4: Tie in the red copper wire. This will be used to rib the fly later.

Step 5: Tie in the black superfloss and wrap forward to form the body.

Pull the superfloss tight to keep the body thin.

Step 6: Take the red copper wire and make 5 to 6 wraps, over the body, to form the ribs.

Step 7: Tie in one peacock herl and wrap behind the bead to form a small thorax.

Step 8: Whip finish and the fly is ready for spring.
