

Marabou Damsel

HOOK: Tiemco 900BL #12-14.

THREAD: Olive 8/0.

TAIL: Olive marabou.

BODY: Marabou from tail, wrapped forward.

WINGCASE: Olive Antron.

EYES: Extra-small red glass beads over 30lb mono, ends melted.

Instructions: For the tail and body, choose a good, fluffy marabou blood feather. Preen the barbs to the tip, and strip away all those that don't reach. The remaining bare feather stem makes a good handle for wrapping the body. If you want more weight in the hook, use a wet/nymph hook like the Tiemco 3769.
