

## Boomerang Lake March 26

**From:** Bruce Murray [drbm@shaw.ca]

**Received:** Sun 03-27-1:15pm

Snuck out with Glen and Wayne for a wee while yesterday, somewhat of a recon to a titch north of Panther Lake, and somehow ended in a fishing expedition on Boomerang Lake. Water conditions 7 to 8 C with chironmid shucks somewhat visible .... Did well on dark olive caddis, black and also green microleech patterns. Everyone was catching fish ....as in busy...so not sure of size but my biggest was 14 inches...very nice color... Great fishing day but the entertainment from the quad goons with getto blasters was not appreciated!!!
