Jack and I got back from the Eve yesterday, Wednesday. We were there from Sunday evening on and fished Monday, Tuesday, and Wednesday until about 2 p.m (July 22 -27). Until wednesday the fishing was pretty spotty with only 5 or 6 fish taken each day. Then on Wednesday it picked up to "pretty" good with some fish being taken and Jack and I got 7 between us that day. I think the fish were starting to come in big numbers but if we had stayed there and fished Thursday we would have probably been able to tell for sure. One thing though, most of the fish are big.
